

DUSTMASTER® DUCT HOSE, FITTINGS & ACCESSORIES

Duct Hose is used for the transfer of dust, fumes, and airborne particles when ventilating a contained or enclosed work area. Available in a range of sizes, Dustmaster® Duct Hose offers the flexibility to adapt to various dust removal systems. Dustmaster® Duct Hose with an inner diameter of 6”–12” is commonly used with blast cabinets and other lower CFM air-moving devices. Dustmaster® Duct Hose with an inner diameter of 14”–24” is commonly used in containments on bridges, shipyards, storage tanks, and water towers, where higher CFM dust collection systems and large diameter fans are used.

APPLICATION VERSATILITY

Duct Hose is used for the transfer of dust, fumes, and airborne particles when ventilating a contained or enclosed work area. By removing dust and airborne particles from the work area, visibility is greatly improved. With improved visibility the operator can precisely target the work surface, increasing production rates.

REDUCED DOWNTIME

A durable polyester vinyl construction offers superior abrasion resistance in tough work environments. A durable wear strip, thermally bonded to the Dustmaster® Duct Hose, protects the heavy-duty steel wire helix against rubbing and abrasion. This combination of quality materials provides superior hose life, reducing hose repair and replacement.

COMMITMENT TO QUALITY

Our commitment to producing the highest quality products in the industry demands strict control over our raw materials and manufacturing processes. All components used in the manufacturing of Marco products adhere to strict process controls as specified by Marco’s Quality and Engineering team.

The 1-1/2” spacing of the reinforcement wire, known as the pitch, provides superior structural integrity to resist collapse versus other hoses on the market with a 2” pitch.

Aluminum Duct Hose Connectors are used in conjunction with Stainless Steel Band Clamps to ensure a secure connection between two sections of hose or dust removal system.

A durable wear strip, thermally bonded to the Dustmaster® Duct Hose, protects the heavy-duty steel wire helix against rubbing and abrasion.

DUSTMASTER® DUCT HOSE, FITTINGS & ACCESSORIES

KEY FEATURES

- 1-1/2" spacing of the reinforcement wire
- Durable polyester vinyl construction
- Durable wear strip, thermally bonded
- Helix against rubbing and abrasion
- Springflex® Hose available for use with high temperature applications

OPTIONAL ACCESSORIES

Dust Socks

Dust socks are made of 100% cotton sateen to fit exhaust fans 16" to 24" in diameter.

Containment Tarps

Containment Tarps are available in a variety of material types.

Dustmaster® Filter Cartridges

Marco manufactured Dustmaster® Filter Cartridges are available with multiple filter media options.

Duct Hose Connectors And Clamps

Duct hose connectors and clamps are available in a variety of sizes.
