

VENTILATION EQUIPMENT

Ventilation equipment help contain airborne dust from an abrasive blasting process. Utilized on dust collectors, Ventilation Equipment is available in a variety of sizes, materials, and motor types. Typical applications include bridges, oil refineries, pipelines, and storage tanks.

APPLICATION VERSATILITY

Dust socks and exhaust fans can be used in a variety of applications, both with mobile and stationary dust collection systems, and are available in a wide variety of sizes and materials for most applications.

AVAILABILITY

Marco stocks over 10,000 SKU's and has over 45 shipping locations to serve North American and International markets for all major brands of abrasive blasting and coating equipment. As the largest provider of surface preparation and protective coatings equipment in the world, with unmatched inventory levels and product availability.

COMMITMENT TO QUALITY

Our commitment to producing the highest quality products in the industry demands strict control over our raw materials and manufacturing processes. All components used in the manufacturing of Marco products adhere to strict process controls as specified by Marco's Quality and Engineering team.
